

# 2023-07 FACT SHEET

## NONWOVENS FOR GLOBAL INDUSTRIES INNOVATIVE. SUSTAINABLE. CUSTOMER FOCUSED.

We work with our customers and partners to develop sustainably innovative nonwoven solutions to improve the quality of people's lives. The individual, the family and our enthusiasm for nonwovens are the building blocks of our DNA.

*#we are the nonwovens people*

### Key figures of 2022

 <b>7</b> global sites	 <b>&gt; 133 M €</b> in sales
 <b>730</b> employees	 <b>218 M</b> produced sqm of nonwovens

### Know-how in nonwovens

Our expertise is continuously growing since 1928. Today, we use following manufacturing and finishing technologies for our carded nonwovens:

- Needlepunch
- Spunlace
- Stitch bond
- Thermal bonding
- Chemical bonding
- Calendering
- Powder Coating

 95 years of experience	 custom solutions	 rollgoods	 individual cuttings	 finishing

### Sustainability

Due to the ecological change, the topic of sustainability is becoming increasingly important in all branches of industry. With our product lines, we want to make our contribution to this.

New and extended product characteristics, recyclability, environmental awareness and the conservation of resources are the focus of attention.

For example, we are increasingly focusing on the processing of recycled carbon and PET fibers (made of PET bottle flakes) or fibers derived from environmentally friendly basic materials such as viscose or wool.

### Business units

In our laboratories and manufacturing facilities we combine extensive knowledge with world class modern nonwoven equipment to provide a wide variety of textile solutions for diverse end-user markets.

 Apparel	 Automotive	 Composites	 Consumer Goods	 Filtration	 Healthcare	 Mobility	 Protection
